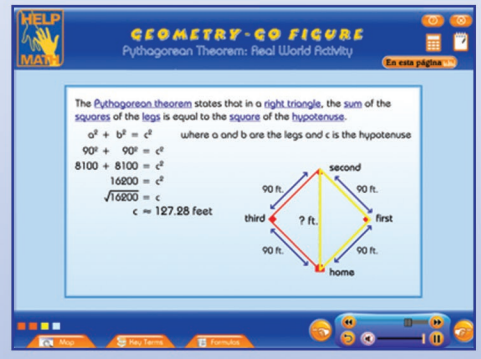
Closing the Achievement Gap in Math

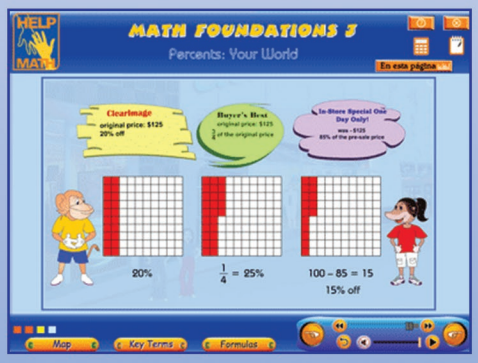
Award Winning

The only ESL math program for grades 3 through 8 awarded the US Department of Education's What Works Clearinghouse highest rating.



Standards Aligned

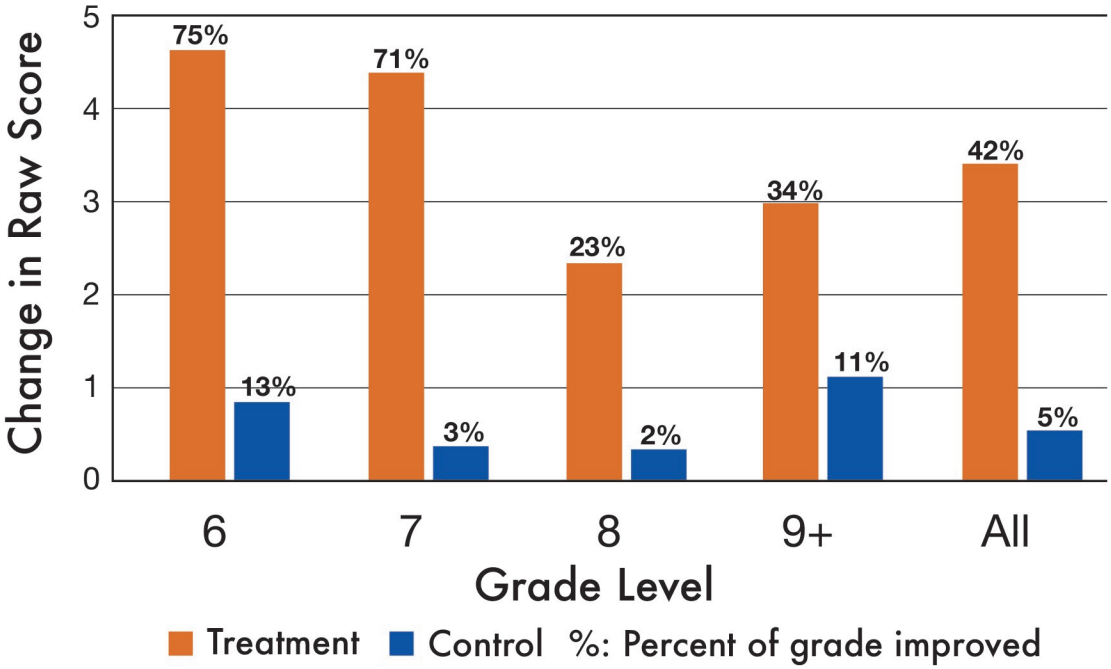
73 lessons (over 200 hours) of instruction and hundreds of diagnostic assessment questions aligned to Common Core, NCTM, and both independent and state standardized assessments.



Embedded Academic Language

Increasing comprehensibility by scaffolding the learning; synchronizing visuals, audio and interactivity to create a visual connection between words, symbols, and meaning.

HELP Math Significantly Increases Test Scores



As part of a U.S. Department of Education study, the University of Colorado conducted multi-state experimental research (>1000 students nationwide), which showed that HELP Math significantly raises students' math test scores.

"I have absolutely loved it! I have been able to put 5 students on HELP Math that had very little or no schooling, and with the aid of a peer mentor they were able to make great strides and eventually rejoined the rest of the group. I also had 2 students on it that were very ADVANCED and they were working on algebra and geometry."

- Cheryl Bosma, Immersion, Ell and Regular Education Math Teacher, South Dakota
